## The WHAT and HOW of Business Analysis

Many professionals find themselves in the role of business analyst on projects lacking an effective approach to analysis and the right tools to do the job.

This workshop is for aspiring and new Business Analysts who need to accelerate their learning curve. This no-nonsense 'how to' workshop takes the Business Analyst through the WHAT, HOW, DO and REVIEW principles, a proven approach to effective business analysis.

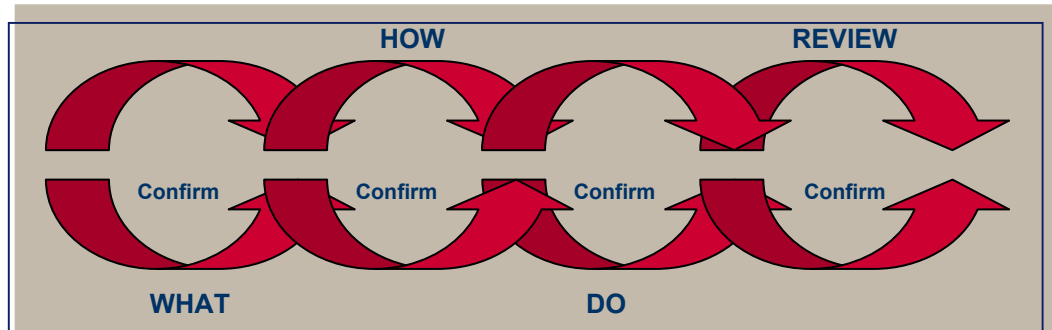

This approach is supported with a cohesive, practical set of techniques and tools for Business Analysts to use in their daily work.

## Case Study

A comprehensive case study is used during the workshop to strengthen the analytical approach, and to provide participants with the opportunity to practically apply many of the tools and techniques.

The case study is takes participants on a journey through the range of skills required to create a business requirements document -

## The Business Analysis Drill Down Framework

### What has to be achieved?

- ◆ Receive the idea or initiative and determine what is required to identify and confirm clarity
- ◆ Gather information
